

What is car-sharing?

Car-sharing is when two or more people share their cars and travel together. It helps you to:

Reduce travel costs

The typical daily car-sharer saves hundreds of pounds a year;

Cut congestion and pollution

Car-sharing reduces traffic & cuts damaging CO₂ emissions;

Meet new people

Car-sharers have reduced stress because they enjoy a sociable drive and often become friends for life.

(You don't even need your own car. Many drivers are happy to offer a lift in exchange for a contribution to petrol costs!)

Remember your first mobile phone?

Remember when petrol was 46p a litre?

It still can be - if you car-share with two other people.
